

Fluke DSX Latest Firmware upgrade

Dear customer,

Due to current changes in cabling standards your "Test Limits" menu may appear different (AS/NZS 3080 now replaced by AS/NZS 11801-1:2019) Standards Australia has a policy of where ISO standards are directly available, the local standards committees should use those and not make local editions. Australian Permanent link and Channel test are a direct copy of ISO standards. All AUS/NZ Permanent Link and Channel tests will be found in the ISO menu (see below)

The MPTL test limits will be the only ones contained in the AUS/NZ region menu as our test limits deviate from ISO standard

Thank you,
The Celemetrix Service Team
